# BRUSTOR ZIP screens

The sun-resistant ZIP screens by Brustor ensure a perfect climate control in your home. Thanks to the unique zip system and ZIP screen technology, the screen remains tightly stretched in the side rails, year after year. Among other things, we offer 1% fabrics, which means that the fabric offers complete privacy without restricting the view to the outside. That is a big advantage compared to shutters. A black-out fabric is also perfectly possible and very suitable for the bedroom. The ZIP screens are available with a square or rounded cassette and in three different sizes.

- ☐ Windproof screens
- ☐ Optimal fabric tension thanks to the unique zip system
- ☐ Perfect climate control in your home

# BRUSTOR Solar vertical blinds

Brustor wishes to contribute to sustainable and ecological sun protection solutions. That is why we developed solar-powered screens. This windproof sun protection is a sustainable solution where we eagerly use a natural energy source to operate the screen. Two birds with one stone: also ideal for spaces where no power supply is possible. The motor of the screen is powered by a battery, which in turn is charged by sunlight. The battery captures the sunrays through a solar panel. The energy stored in the battery then ensures that the B1100 / B1350 ZIP solar can continue to function on both sunny and slightly cloudier days, even on a north-facing façade.

- ▨ Screen on solar energy
- ▨ Durable and practical
- ▨ Simple mounting

# BRUSTOR B1200 ZIP screen

Are you looking for vertical sunblinds for the windows of your new construction project? The B1200 ZIP screen from Brustor can be fully integrated. The bottom lead rail disappears completely into the housing. A ZIP screen is very tight and windproof thanks to the zip system. A screen is the ideal sun protection for a home with large windows. During the colder months, you enjoy the pleasant sunrays, while in the summer you prevent your home from becoming uncomfortably warm. The screens protect the glass from sunrays, and in addition, you have no inconvenient light on your TV or PC screen. Visually there is no objection, because you preserve the view to the outside. You can choose from a wide range of sun-resistant and insect-repellent fabrics. The screens are easily accessible for any repairs and are mounted very quickly and smoothly. Thanks to these screens, you use less energy and cooling is no longer required.

- ▨ Housing and side rail of the screen are fully integrated
- ▨ Specifically designed for new construction
- ▨ Unique zip system

# BRUSTOR Corner screen

This corner screen from Brustor was designed for corner windows, where the glass meets in the corner. The screens have no disturbing profiles, which ensures an unobstructed view to the outside. They roll up and down at the same pace to distribute the shade evenly in the living room. The corner screen has a rectangular housing and can be combined perfectly with other Brustor screens.

- ▨ Panoramic screen
- ▨ Specifically for corner windows
- ▨ Can be easily combined with other Brustor screens

# BRUSTOR Indoor screen

Our indoor screen is the ideal sun protection solution for indoor applications. This indoor sunblind can be built into a niche very discreetly and easily mounted by means of two ceiling or wall mounting brackets. The screens are very user-friendly and when they are not in use, you hardly even notice them. When opened, they have a sleek look and you still have a clear view of the garden, whereas you can limit the view to the inside. The screens are very suitable for large windows. The more glass, the more the spaces warm up, but thanks to the indoor screen you prevent overheating. You can also avoid the incidence of sunlight on your TV screen, without darkening the room. We have a wide selection of fabrics and colours available. Moreover, we offer projection screens, which you can use as a cinema screen to project videos onto it with a beamer.

- ▨ Ideal for large windows
- ▨ Control over the temperature in your home / office
- ▨ Ceiling and wall mounting possible

# BRUSTOR Windblocker

Do you want to stay out of the wind, keep away from prying eyes, and create more shadow? Look no further and opt for the Brustor windblocker. You can attach the stretched fabric directly to the wall or to a pole. The windbreak can therefore be mounted anywhere and on every facade. The integrated spring ensures an optimal tension of the high-quality, dirt-repellent fabric. This side awning stops the wind, but can also serve as a safety fence on the terrace for children or animals. The screen can be mounted quickly and has a simple, manual operation via the handle and a handy lock. Match the windblocker perfectly to your home or awning, in terms of colour and fabric, for years of enjoyment.

- ▨ Windscherm voor terras
- ▨ Tegen wind, indiscrete blikken en laagstaande zon
- ▨ Eenvoudige bediening

# BRUSTOR Drop arm awning

The Brustor B2100 is a storm-resistant drop-arm awning, ideal for retail applications. The windows are protected from the sun as the awning keeps out disruptive sunlight. The fabric disappears completely into the cassette and the view to the outside is preserved. The fabric can also be printed with a logo or company name and you can personalize it even further thanks to a wide range of sun protection fabrics and over 200 **RAL colours**.

- ☐ Stormproof drop-arm awning
- ☐ Design with a housing
- ☐ Personalize by having your logo or company name printed
